### DESCRIPTION

#### TC.AdaptiveCandlesticks is an easy to install, multilingual customizable Indicator designed to help traders make profitable decisions 24/5!

Candlestick charts illustrate changes in the underlying supply/demand lines or the constant fight between buyers and sellers. The interpretation of candlestick charts is based primarily on patterns. There are dozens of candlesticks patterns and mastering them all can be a daunting task. We have done this hard work and selected 16 patterns we think best represent market psychology or emotion, and have combined them with our unique quantitative and technical expertise. TRADING CENTRAL Adaptive Candlesticks (TCAC) will mark any MT4 chart with valid open-high-low-close prices with patterns we believe are the most appropriate for decision making while removing patterns less relevant in the context of what occurred before in the market and technical analysis. TCAC will recognize for you in real time reversal and continuation candlesticks patterns to enhance your trading skills and timing. You can use TCAC to better enter and exit the market while also managing your risk more appropriately. Best of all, this approach can be used on any time frame, from one minute bar to monthly or more bar. Although TCAC does not provide price targets it provides useful timing signals and can be combined with our ANALYST OPINION INDICATOR.

#### SUBSCRIBING TO THE TRADING CENTRAL LIVE FEED

The TRADING CENTRAL Indicator automatically delivers live data to licensed broker. If the Indicator does not work on your MT4, your broker is probably not licensed by TRADING CENTRAL. In this case please contact your broker and request a license.

### UPGRADE PROCESS

When a new version of the Indicator is available, a user gets a notification inside their MetaTrader and the loading starts automatically after clicking the OK button.

The previous version is no longer valid.
